PROFESSIONAL SUMMARY

UI/UX Designer with almost 2 years of experience designing digital products, websites, dashboards, and mobile applications across fintech, SaaS, AI, and e-commerce industries. Experienced in leading the design process from user research, user flows, and wireframes to high-fidelity interfaces, responsive design, prototyping, and developer handoff. Worked on projects ranging from landing pages to complex products, including a 35+ screen fintech marketplace and escrow platform. Skilled at transforming complex business requirements into intuitive, user-centred experiences that balance usability, visual design, and business goals.

TECHNICAL SKILLS

Design Tools: Figma (Advanced), Framer, Claude AI (prototyping and front-end generation), Canva

UX Process: User-Centred Design, Information Architecture, User Flows, Wireframing, Interactive Prototyping, Design Systems, Usability Testing

UI Skills: Responsive & Mobile-First Design, Layout & Composition, Typography, Colour Theory, Visual Hierarchy

Graphic Design: Logo Design, Brand Identity, Visual Communication

PROFESSIONAL EXPERIENCE

Product Designer — **Cver AI** | Remote | Jan 2026 – Jul 2026

- Contributed to product growth from 1,000 to 2,000+ registered users through improvements across the web and mobile product experience.
- Designed user-centred, content-rich interfaces across the web and mobile product suite, maintaining consistent information architecture and visual hierarchy throughout.
- Built admin dashboards that turned complex, data-heavy workflows into clear, navigable user journeys for internal teams.
- Created and maintained the company Figma design system and reusable component library, standardising typography, colour, spacing, and core UI components across web and mobile.
- Partnered with developers and product stakeholders from handoff through QA, ensuring designs shipped accurately and on brief.

UI/UX Designer (Contract) — **Makeda Fintech** | Remote | Mar 2026 – Apr 2026

- Designed 35+ screens for a mobile fintech app, applying mobile-first, responsive principles with disciplined layout, typography, and spacing.
- Designed the onboarding, escrow, and dispute-resolution flows — breaking high-stakes financial interactions into guided steps with clear status indicators and next-action cues at every stage.
- Produced user flows, high-fidelity mockups, and interactive Figma prototypes that communicated design intent clearly to non-design stakeholders.

UI/UX Designer — **Zoeverse** | Remote | Dec 2025 – Jan 2026

- Designed responsive, content-rich web interfaces for a health-tech platform, prioritising clean visuals and effortless navigation.
- Applied WCAG accessibility standards and best-practice usability guidelines across all delivered screens.

UI/UX & Graphic Designer, Intern — **UPSEZ Digital** | Remote | Oct 2025

- Designed clean, modern UI screens for client digital products, maintaining strong visual consistency across deliverables.
- Produced wireframes, mockups, and Figma prototypes to communicate design concepts to stakeholders.
- Created logo designs and brand identity assets to client brief, managing multiple concurrent tasks to deadline.

SELECTED PROJECTS

Student Budget App — **Personal Project** | *Mobile UI/UX*

- Designed a student budgeting app integrated with wallet and bank systems, mapping end-to-end journeys across onboarding, transactions, and budget tracking.
- Built wireframes and high-fidelity Figma prototypes focused on visual hierarchy that makes dense financial data legible at a glance.

Vendify — **Personal Project** | *Mobile UI/UX*

- Designed a location-based social commerce app for discovering nearby vendors, browsing products, and negotiating via in-app messaging.
- Combined social browsing with real-time communication so users could confirm price and availability before travelling to a vendor.

AI-Driven Assessment System — **Personal Project** | *Web UI/UX*

- Designed an AI-powered academic assessment platform with integrated plagiarism detection for students and educators.
- Translated data-heavy functionality into clear data-visualisation screens presenting results and plagiarism reports intuitively.

Additional projects — Relocate Connect, App Subscription Tracker — available in portfolio.

EDUCATION

BSc Computer Science — Babcock University, Ilishan-Remo, Ogun State | 2025
